Skills

- **Languages:** Java, JavaScript, TypeScript
- **Frontend & Mobile:** React, Next.js, Tailwind CSS, Flutter
- **Backend:** Spring Boot, Node.js, Express.js, NestJS
- **Databases & ORM:** PostgreSQL, MySQL, MongoDB, Prisma
- **Tools & Platforms:** Git, Linux, Docker, AWS, Firebase, Flutter

Professional summary

Software Engineering graduate with hands-on experience developing full-stack web applications through an industry internship and personal projects. Experienced in using Java, JavaScript, and TypeScript alongside frameworks and technologies such as Spring Boot, React, Next.js, and Node.js. Familiar with relational databases, API development, and modern software engineering practices.

Work experience

Software Engineering Intern

Kingteza Software Solutions, Malabe — Mar 2025 – Sep 2025

- Developed and maintained four full-stack web applications using **React.js, Next.js, NestJS, TypeScript, and PostgreSQL**.
- Identified and resolved bugs across frontend and backend components, improving application stability and functionality.
- Built responsive user interfaces with Ant Design and developed RESTful APIs.
- Implemented authentication and authorization using **Firebase and Auth0**, and managed database operations with **Prisma ORM**.
- Collaborated with UI/UX and backend teams in an Agile environment, using Git for version control and Jira for task tracking.

Education

BSc (Hons) in Information Technology, specializing in Software Engineering

Sri Lanka Institute of Information Technology — Jun 2022 – Jun 2026

- Dean's Lister (2022 - 2023): Recognized for academic excellence

Projects

Operion - Smart Workforce Operations Platform — Jun 2026 – Sep 2026

Spring Boot, Java, MySQL, Docker

- Developed a workforce management platform covering employees, departments, attendance, leave, projects, and tasks.
- Implemented **JWT authentication** and **RBAC** for four user roles: Admin, HR, Manager, and Employee.
- Built **49 REST API endpoints** with input validation, standardized responses, pagination, and custom exception handling supported by **54 automated tests**.
- Containerized the application with **Docker** and automated builds and **GHCR image publishing using GitHub Actions**.

Movieverse web — Dec 2024 – Dec 2025

Next.js, TypeScript, Tailwind CSS, Shadcn UI

- Developed a movie platform by integrating the **TMDB API** for film data and the YouTube API to embed trailers.
- Implemented **user authentication** and a **personalized multi-list** watchlist.

- Optimized performance and user experience through **server-side rendering** with Next.js and a responsive, type-safe frontend.
- **Continuously expanding the platform by integrating new features** based on user feedback and personal experimentation.

Smart Medix Healthcare System Jul 2024 – Oct 2024

MERN Stack, JavaScript, Recharts, Tailwind CSS

- Developed a feature rich **Hospital Management System** with role-based dashboards for administrators, doctors, and patients.
- Created a core **admin analytics dashboard** using **Recharts** to visualize and track 12-month data in appointments, revenue, and patient flow.
- Engineered key operational features include **doctor search and filtering**, **appointment scheduling**, and **patient record management**.

DevCore - Personal Developer Knowledge Platform Sep 2026 – Present

Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS

- Built **a full-stack technical knowledge platform** for managing notes, questions, code snippets, resources, and mistakes through a structured topic hierarchy.
- Designed and implemented a **reusable data model** using PostgreSQL and Prisma to support topic-based relationships, tagging, and content filtering.
- Developed **rich-text editing, CRUD workflows, topic navigation, and dynamic filtering** using Next.js and TypeScript.
- Deployed the production application on **Vercel with PostgreSQL hosted on Neon**.

Shopiflow Shopping Mall Web Application Jun 2024 – Oct 2024

MERN Stack, JavaScript, Tailwind CSS

- Developed a shopping mall management platform enabling customers to digitally discover stores, browse products, and view promotions.
- Engineered a unique core **virtual queuing system** that allowed users to join and manage shop queues remotely, significantly improving in-person customer flow.
- Built a **responsive admin interface** for mall staff to monitor queue status and manage offers, contributing to efficient operations.

Atlaso Jul 2025 – Aug 2025

Vite, JavaScript, Tailwind CSS

- Developed a comprehensive country information hub by integrating the **REST Countries API** to display real-time data like demographics, currencies, and languages for every nation.
- Implemented **advanced user features** including multi-criteria search (by name, region, currency), dynamic filtering, and secure **user authentication with Firebase**.
- **Delivered engaging user experience** with a fully responsive, animated interface designed for clarity and seamless interaction across all devices.

DashDrop Express (Web Application) Mar 2024 – May 2024

MERN Stack, JavaScript, Node Mailer, Tailwind CSS

- **Led a team of 8** in the full-stack development of a courier service platform, from initial planning to deployment.
- Engineered core functionalities including **online package ordering**, **real-time delivery tracking**, and **automated email notifications** using Node Mailer.
- Architected the system for **efficient management** of orders, driver assignments, and customer communications, ensuring reliable service operations.
